Carlington Community Association's Anti-Discrimination Statement

January 2021

The Carlington Community Association (CCA) recognizes that some members of our community confront systemic inequities alongside experiences of racism and injustice. As a local representative body, we cannot ignore the influence we have in Carlington and in Ottawa as a whole. The CCA is committed to building a greener, safer and better Carlington that provides a home for neighbourhood projects, activities and social events. We are committed to raising consciousness and taking meaningful action within the broader community. We do so by promoting and mobilizing our community, providing a forum for community members to engage on matters of common interest, and producing and sharing knowledge. We believe that together, we can build a compassionate and welcoming environment where all Carlington community members can build a better life.
